REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or disclose a drive circuit comprising, in combination with the remaining features of the claims, a drive transistor connected at a pair of its main electrodes respectively to the drive output terminal side and a reference voltage source side; an operational amplifier for controlling an output voltage that is output from the drive transistor; a detection transistor for detecting a current that flows through the drive transistor, the drive transistor and the detection transistor forming a mirror circuit; a first feedback loop for detecting the output voltage at the drive output terminal and feeding back the output voltage to the operational amplifier; and a second feedback loop for detecting an output current of the detection transistor and feeding back the output current to the operational amplifier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Vu whose telephone number is (571) 272-1831. The examiner can normally be reached on M-F 8am-430pm.
